

Casio Releases New Shock-Resistant MT-G Watch with a Vintage Look

Look Achieved by Layering Gold and Black Ion Plating

MTG-S1000BS

BASEL, March 26, 2014 — Casio Computer Co., Ltd. announced today the limited edition release of a new MT-G shock-resistant watch that combines strength and beauty. With only 500 watches produced, the MTG-S1000BS features a vintage feel including brass accents created by layering gold and black ion plating.

The MT-G line of G-SHOCK watches offer outstanding shock-resistance combined with the feel and appearance of a metal exterior. As part of this line, the MTG-S1000 was released last year. It featured a new Core Guard Structure for shock-resistant performance, advanced Triple G Resist* construction, and an exterior with the look and feel of metal. It has gained popularity for its tough performance, and its clean and simple lines.

* Reinforced construction to resist shocks, centrifugal force and vibrations.

While based on the robust and timeless design of the MTG-S1000, the new MTG-S1000BS features a special ion-plating finish for a vintage feel. It conveys the appeal of a G-SHOCK watch that can withstand harsh environments and be used for many years. To achieve the color of brass which is known for becoming even more attractive as time goes on, the new watch features black ion plating layered over gold ion plating, with some of the top layer then burnished away. The result is a well worn appearance, creating a special model with a vintage feel.

Specifications

Construction	Triple G Resist (shock-resistant, resistant to centrifugal force and vibration-resistant)
Water Resistance	20 bar

Radio Frequency	77.5 kHz (DCF77: Germany); 60 kHz (MSF: UK); 60 kHz (WWVB: USA); 40 kHz (JJY: Fukushima, Japan) / 60 kHz (JJY: Kyushu, Japan); 68.5 kHz (BPC: China)
Radio Wave Reception	Automatic reception up to six times a day (except for use in China: up to five times a day); manual reception
World Time	29 cities (29 time zones; daylight saving on/off; daylight saving time (summer time) auto switching/ standard time and Coordinated Universal Time
Stopwatch	1/20-second stopwatch; measuring capacity: 120 minutes; auto-start
Countdown Timer	Measuring unit: 1 second; countdown range: 120 minutes; countdown start time setting range: 1 to 120 minutes
Other Functions	Automatic hands correction; daily alarm; full auto-calendar; battery recharge warning
Power Source	Tough Solar power system (solar-charging system)
Continuous Operation	About 27 months with the power-saving function* ON after full charge *Power-saving after a certain period in a dark location
Size of Case	58.6 × 53.5 × 15.5 mm
Total Weight	Approx. 188 g
