

## PRW-3500Y-1AER

The new PRO TREK with water-resistance up to 20 bar

Norderstedt, February 2015 – Outdoor and mountaineering enthusiasts rely on watches for orientation wherever they are, because extreme conditions call for extreme technology. The latest PRO TREK model fits seamlessly into the series and is an impressive companion, even in difficult situations.

The new PRW-3500Y-1AER model is as reliable as well as stylish companion for all outdoor experts. **Aesthetically simple at first glance – but when you take a closer look, the new PRO TREK brings a well-engineered and sophisticated show of colours to light. The rich dark blue of the side operating elements is reflected in the bezel and other details on the watch, while the case and wristband are kept in black.**

**The PRW-3500Y-1AER also features a robust look.** The rotating bezel is made from metal, and the compass rose emphasises its features with distinctive wind directions.

Just as with the predecessor model, the PRW-3500Y is also equipped with the latest generation of Triple Sensors – the state-of-the-art digital compass, altimeter and thermometer/barometer all have room in this small space and provide data reliably, efficiently and quickly. The large, clear digital display, which is kept in black and white, enables data to be comfortably read in any weather conditions.

But as you would expect, the new PRO TREK is equipped with even more functions: radio reception in EU, USA, Japan and China, sunrise and sunset time display, stopwatch, countdown timer and five alarms are always at your disposal. The Tough Solar technology ensures independence from a power supply for up to 23 months. A special feature of the PRW-3500Y is its water-resistance up to 20 bar, making it an ideal companion for many outdoor sports such as hiking, climbing, mountain biking or also fishing.

The **PRW-3500Y-1AER** is now available at selected watch stockists and includes the following features:

- Super Full Auto LED light
- Low-Temperature-resistant (–10°C)
- Solar-powered
- Radio signal reception in EU, USA, Japan, China
- Barometer
- Thermometer
- Digital compass
- Altimeter and altitude addition with data memory
- Sunrise and sunset display
- World time function
- Stopwatch function
- Countdown timer
- Five daily alarms and snooze function
- Automatic calendar
- 12-/24-hour display
- Mineral crystal
- Resin case and wristband
- Battery level indicator
- Water-resistant up to 20 bar

**ABOUT PRO TREK:**

Under extreme conditions, advanced, reliable and easy-to-use technology is worth its weight in gold, no matter where the adventure takes us. Demanding outdoor fans appreciate Casio's PRO TREK series: the tough outdoor watches accompany their owners in all situations between mountain tops and sea level with a digital compass, altimeter, barometer, thermometer and many more practical functions.
