

The new EDIFICE Connected Watch in cockpit design

All sports functions at a glance

ECB-900DB

CASIO EDIFICE continues to rely on its successful Connected Watches concept and presents the new ECB-900, which features intelligent racing functions and is the perfect companion for all men who know no (speed) limits in life.

The dial of the ECB-900 looks like the cockpit of a racing car and is very clear to read. The dial at 4 to 5 o'clock shows the average speed. In addition, the timepiece has a lap memory that records up to 200 laps of a race and displays the times in a clear graph on the smartphone. The fastest lap is highlighted.

The Bluetooth timepiece pairs with a smartphone to consistently provide the exact time all over the world with the help of Accurate Time System technology. Using the world time function at 9 o'clock, the wearer can select from 29 different time zones and reliably read the date and day of the week at 12 o'clock.

With the solar technology specially developed by CASIO, the chronograph is also convincing in terms of sustainability. Tiny solar cells absorb artificial light and store the energy. These enable a dark power reserve of up to 2 years.

The ECB-900 doesn't just score points for its functions. The dynamic design also makes car racing fans' hearts beat faster. The black-coated bezel with tachymeter display and the dark dial give the timepiece a dynamic look, while the red colour accents on the second hand and dials underline the sporty character of the watch.

The integrated LED lighting and neo-display ensure that late nights in the fast lane do not become an obstacle. With a water resistance of 10 bar and a high-quality stainless-steel case and strap, the Chronograph also masters falls into the water.

The ECB-900 is available in stores from March onwards at a **recommended retail price of EUR 199 (RRP)**.

Water resistance		10 bar
Technical communication data	Communication standard	Bluetooth® (Low Energy)*
Stopwatch		1/10 second, 24 hours; 200 lap data records
Countdown timer		Measuring unit: 1/10 second; countdown range: 24 hours
Alarm		5 multifunctional alarms, hourly signal
Other features		Smartphone Link (world time: over 300 cities, auto time adjustment), Display of date/weekday Automatic calendar Hand-shift function, fully automatic double LED light (Super Illuminator); charge control indicator
Energy supply		Tough Solar
Power supply		Up to 24 months with power-saving function
Size of Case		51.5×48.0×13.9 mm
Total weight		Approx. 163 g
