
Robust and ultimate comfort
The PRO TREK PRW-60T Titan Outdoor Watch

PRW-60T

Casual, sporty, comfortable. The latest addition to the PRW-60 outdoor watch series from PRO TREK convinces not only by its high-performance functions, but also by its look. The satin case and bracelet in titanium give the watch a casual and elegant look that scores well both in the urban world and in the great outdoors. In addition, the high-tech material offers ultimate robustness and, at the same time, is comfortable as titanium is so lightweight. With its slim housing design, the PRW-60T also fits very well on narrower wrists. The Triple Sensor developed by CASIO provides highly accurate information on temperature, altitude and air pressure. The PRW-60 can easily handle tours up the world's highest mountains and reliably shows altitudes of up to 10,000 m. Even cold snaps down to -10 degrees Celsius don't bother it. The integrated Digital Compass measures and displays 16 points of the compass. The Wave Ceptor technology enables radio reception of six signals worldwide. This guarantees that the watch is always set to local time.

Thanks to the newly developed case structure, the strap lugs are not connected to the side of the case as usual, but to the back of the case. In addition, important components in the electronic crown and the arrangement of the sensors have been redesigned.

The hands and indices have been given a fluorescent coating, which makes them easier to read in the dark.

The slim profile of the PRW-60 also fits a woman's wrist perfectly and guarantees maximum freedom of movement even during sports such as climbing. And if you are looking for sustainability, PRO TREK outdoor watches are the perfect choice. With integrated CASIO Tough Solar technology, the energy supply is controlled by solar cells, which, depending on use, provide a runtime of up to about 25 months.

The PRT-60T will be available for a suggested retail price of € 549 at selected PRO TREK Dealer. A dealer search can be found at <https://www.protrek.eu/de>.

Technical data

Performance	Water resistance 10 bar, insensitivity to cold (-10°C / 14°F)
Radio signal	EU, USA, JPN and CHN
Digital compass	Measures and shows 16 points of the compass
Barometer	Measuring range: 260 hPa to 1100 hPa Atmospheric pressure tendency alarm (arrow shows considerable pressure changes)
Altimeter	Measuring range: -700 m to 10,000 m measuring unit: 1 m (5 ft.)
Thermometer	Measuring range: -10°C to 60°C; measuring unit: 0.1°C
World time	29 cities (daylight savings time on/off)
Stopwatch	1/100-second, measuring capacity: 24-hour display
Countdown timer	Measuring unit: 1/10 second; countdown range: 60 minutes
Alarm	5 daily alarms, hourly signal
Other functions	Charge control display, full auto-calendar; 12/24-hour format; automatic LED backlight, hand shift feature (manual, automatic: barometer/altimeter/thermometer)
Energy supply	Tough Solar
Power supply	Up to 24 months with power-saving function
Dimensions Case	50.5×47.2×13.3mm
Total weight	Approx. 98 g
